

HOW TO SAVE A LOG FOR EVOLUTION IN FRONTLINE

Note: Any EVO Swaps MUST be approved by Anthony Raso or Peterson Germain, no exceptions. Each one swapped MUST have the acct# it was removed from and needs to go back to 4558 in Orlando.

Step 1) In Frontline Tier 2&3, click on “**Configuration**” tab on bottom left.

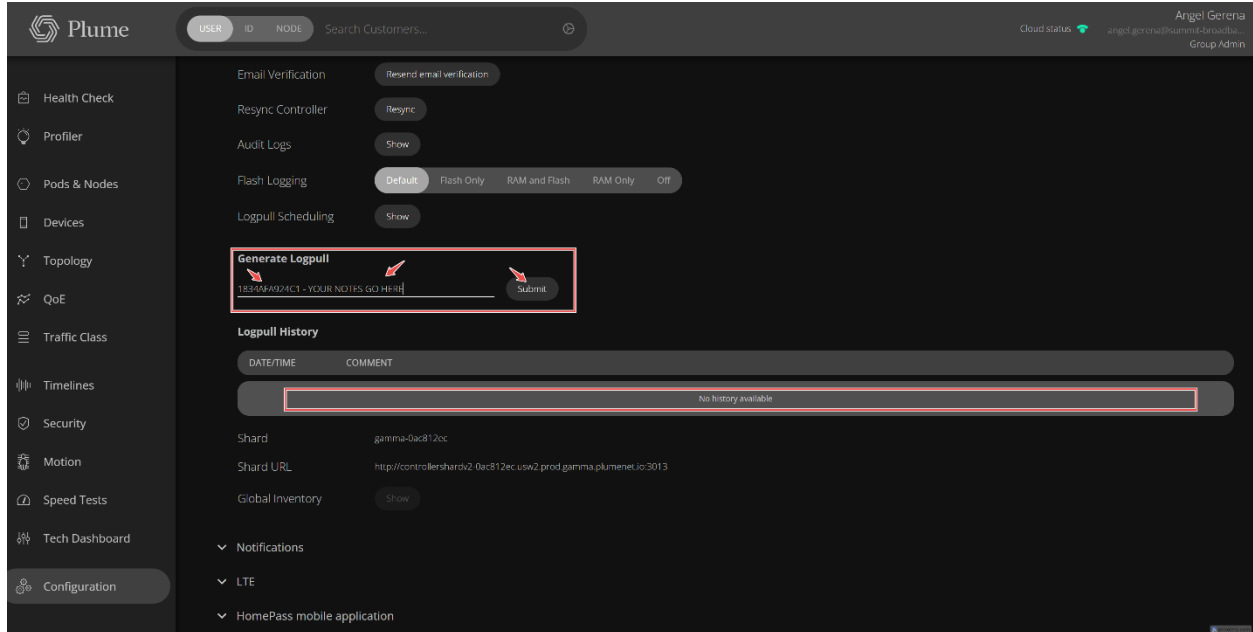

Step 2) You can either get the CPE S/N or MAC from your OFS or click on the “**Tech Dashboard**” to simply highlight and copy it from there.

HOW TO SAVE A LOG FOR EVOLUTION IN FRONTLINE

Step 3) Click on “**Configuration**” tab again on the left then scroll down and expand “**Utilities**”. This is where you will enter in the EVO’s S/N or MAC Address along with a brief note advising of what issues it is having.

When you enter in the S/N or MAC Address along with your note and click on “**Submit**”, it will get recorded below where it shows (No History Available). Evolution will use this log in lab when they receive the EVO that was swapped out to see if they can replicate the issue.

Note: This **MUST** be done even if the EVO is offline. It will still allow you to save a log. Let me know if you have any questions.

Thank you.
